Goals

The main goals for this slide:

▶ This is just to show you how this *template* works
▶ There are two 'emphasize' functions used to highlight & italicize texts
  ▶ '\empy' does *this* and '\empr' does *this*.
▶ The colors in this template is selected from the official Stanford Identity website: https://identity.stanford.edu/color.html
▶ Note that hyperlinks, by default, are not highlighted. Of course, you can change this: e.g., *https://github.com/sanhacheong/stanford_beamer_presentation*

Example

A (hopefully) useful function in this LaTeX-template Cheong (2018) is:

$$\ex000amplebox\{ExampleTitle\}\{ExampleContents\}$$

\examplebox{ExampleTitle}{ExampleContents}

which does this:

> ### Example of the Command \examplebox
>
> This is what it does. Pretty self-explanatory, isn't it? Given the color them, I *recommend* using \empr inside of examplebox. The \empy command does not look *that* good.
